

Ajay Sharma (Yash)

Full-Stack Software Engineer

Kathmandu, Nepal | +977-9827373796 | aakirtsharma123@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-Stack Software Engineer with strong experience building AI-powered, multi-tenant SaaS platforms and data-intensive applications. Specialized in developing scalable analytics dashboards, real-time systems, and enterprise-grade web applications using React, Next, TypeScript, Node.js, Nest, PostgreSQL and MongoDB. Skilled in designing responsive UIs, implementing secure authentication systems, and optimizing real-time and media-heavy applications.

Hands-on experience with WebSockets, chunked video uploads, and cloud-based media pipelines, with a focus on performance and user experience. Passionate about writing clean, maintainable code and building production-ready systems.

EXPERIENCE

Software Engineer – DataToInsights AI

Remote / US | 2025-Present

- Contributed to a SaaS-based AI data intelligence platform for transforming raw data into actionable insights
- Built and maintained **scalable frontend applications using React & TypeScript**, improving data visualization and user interaction
- Integrated **REST APIs and AI-driven services** to enable automated insights generation
- Worked on **user management, authentication, and subscription systems** for multi-tenant SaaS architecture
- Collaborated with cross-functional teams to deliver **high-performance and production-ready features**

Full-Stack Developer – CloudPro AI

Remote / US | 2025-Present

- Developed and deployed **full-stack web applications** using React, Node.js, and MongoDB
- Implemented **real-time systems and API integrations** to support AI-powered workflows
- Set up **monitoring and observability stack using Grafana, Loki, Prometheus, and Datadog**, improving system reliability
- Optimized backend performance and handled **scalable data processing pipelines**
- Worked on **secure authentication systems (JWT, OAuth)** and role-based access control

PROJECTS

DataToInsights – AI SaaS Analytics Platform

Role: Software Engineer - [datatoinsights.ai](#) · [app.datatoinsights.ai](#)

Tech: React, TypeScript, SaaS Architecture, API Integration, AI Services

- Built an AI-native, multi-tenant analytics platform that unifies enterprise data sources and delivers decision-ready insights.
- Integrated diverse data sources (databases, CRMs, spreadsheets, APIs) into a real-time analytics layer with scalable ingestion and transformation pipelines.
- Developed AI-powered workflows for data profiling, anomaly detection, and automated insight/report generation.
- Implemented semantic layer + conversational analytics (text-to-SQL, chart generation) for natural language data interaction.
- Designed enterprise features including RBAC, data lineage, and high-performance dashboards with caching and virtualization.

Bevlytics – Data Analytics & Insights Platform

Role: Software Engineer - [bevlytics.ai](#)

Tech: React, TypeScript, Data Visualization, API Integration

- Developed complex filter systems (SKU/brand/segments) with debounced queries.
- Built high-performance grids and charts for large datasets (virtualization, lazy loading).
- Implemented real-time updates via polling/WebSockets for live analytics.
- Designed export/reporting features (CSV/PDF) and shareable dashboard states.
- Reduced UI latency by optimizing rendering and minimizing re-renders.

420lytics – AI Analytics Platform

Role: Software Engineer - [420lytics.ai](#)

Tech: React, TypeScript, Data Visualization, AI Integration

- Built ingestion pipelines for messy Excel/CSV with validation, mapping, and normalization.
- Created KPI dashboards for inventory, sales velocity, and product performance.
- Integrated AI-driven insights for trend detection and recommendations.
- Implemented background processing for heavy transformations and caching.
- Designed modular charting system for rapid feature expansion.

Central Coast Analytics – BI & Tableau Integration Platform

Role: Software Engineer - <https://app.centralcoastanalytics.com/>

Tech: React, TypeScript, Tableau, Data Visualization, API Integration

- Embedded Tableau dashboards and Tableau Pulse into a React app using secure embedding.
- Implemented SSO/secure token exchange for accessing Tableau resources.

- Built wrapper components for Tableau viz with parameter controls and event handling.
- Synced app filters with Tableau parameters for cohesive cross-tool analytics.
- Optimized iframe/viz loading, error handling, and responsive layouts.

FormBuilder – Workflow & Data Collection Platform

Role: Software Engineer

formbuilder-qa.kwant.ai

Tech: React, Forms, API Integration

- Built dynamic form builder with schema-driven rendering and validations.
- Implemented conditional logic, multi-step forms, and reusable field components.
- Added response tracking dashboards and export capabilities.
- Ensured accessibility and performance for large forms.

MeddigiScan – AI Medical Imaging Platform

<https://meddigiscan.vercel.app/> | <https://github.com/AjaySharma78/Meddigiscan-frontend>

Tech: React, TypeScript, Tailwind CSS, API Integration

- Built a frontend for an **AI-powered medical imaging platform** that analyzes medical images for diagnostic insights
- Implemented **image upload and processing workflows** with real-time feedback
- Designed a **responsive and user-friendly UI** for healthcare-focused use cases
- Integrated backend APIs for **AI inference and result visualization**
- Focused on **performance optimization and smooth user experience** for handling large image data

FullStackTube – Video Streaming Platform

<https://full-stack-tube.vercel.app/> | https://github.com/AjaySharma78/FullStack_Tube

Tech: React, TypeScript, Node.js, MongoDB, Cloudinary

- Developed a scalable video platform with **JWT, OAuth, and MFA authentication**
- Implemented **chunked video uploads with progress tracking**, improving upload reliability
- Used **MongoDB aggregation pipelines** for efficient data querying
- Integrated **WebSockets for real-time updates**

Pencrafted – Blog Platform

<https://pencrafted.vercel.app/> | https://github.com/AjaySharma78/Blog_project

Tech: React, Redux Toolkit, Tailwind CSS, Appwrite

- Built a full-stack blogging platform with **secure authentication (OAuth + email verification)**
- Implemented **CRUD operations** for posts with a rich text editor (TinyMCE)
- Designed a **responsive UI with dark/light mode support**
- Improved navigation performance using **React Router DOM**

MeetMe – Video Conferencing App

<https://meetme-mlno.onrender.com/> | <https://github.com/AjaySharma78/meetME>

Tech: WebRTC, Socket.io, JavaScript

- Built a real-time video conferencing app with **low-latency audio/video streaming**
- Enabled **room-based communication with unique IDs**
- Added **real-time chat and collaborative whiteboard features**
- Designed a responsive UI for cross-device usability

SKILLS

Frontend: React, TypeScript, Redux Toolkit, Tailwind CSS, Zustand, TanStack Query

Backend: Node.js, Express.js, MongoDB, PostgreSQL, Nest.js, Redis

Auth & Security: JWT, OAuth, MFA, Cognito, Casbin,

Real-time & Media: WebSockets, WebRTC, Cloudinary, Multer

Tools & DevOps: Git, GitHub, Vercel, Render, Postman, VS Code, Grafana, Prometheus, Loki, Datadog

EDUCATION

Bachelor of Engineering in Computer Engineering

Purbanchal University, Nepal

Higher Secondary Education Board (+2)

Shikshadeep College

Secondary Education Examination

Saptakoshi English School

COURSES

- Programming with JavaScript – Coursera
- Introduction to Front-End Development – Coursera
- Generative AI Training – Leapfrog Technology (Hands-on training covering LLMs, prompt engineering, and AI application development)
