SUMMARY

Enthusiastic Full-Stack Web Developer with a focus on building dynamic, interactive, and scalable web applications. Skilled in React, TypeScript, Redux Toolkit, Node.js, and MongoDB, with hands-on experience in creating responsive UIs, secure authentication systems, real-time communication features, and optimized video handling workflows. Passionate about designing well-structured, user-friendly interfaces and developing robust backend solutions. Through recent projects, gained expertise in chunked video uploads, WebSockets for real-time updates, and enhanced performance optimizations. Committed to continuous learning and contributing to innovative solutions that elevate user experiences.

PROJECTS

Blog Website - {Pencrafted}

<https://pencrafted.vercel.app/>

A responsive web-based blog platform that offers a dynamic and interactive user experience with robust backend functionalities.

Technologies: React, Tailwind CSS, Appwrite, Redux, TinyMCE, React-Hook-Form, HTML-React Parser, React Router DOM

[Github link](#)

- **Secure Authentication & User Management:** Developed secure login and signup forms featuring email verification and OAuth integration using Appwrite, ensuring robust user access and security.
- **Robust Content Creation & Management:** Enabled full CRUD operations for blog posts, integrated TinyMCE for a rich text editing experience, and empowered both authors and community users to create and manage content.
- **Responsive & Dynamic Interface:** Applied Tailwind CSS for a modern, responsive design, implemented persistent light/dark mode with locally stored preferences, and utilized React Router DOM for smooth navigation.

Video Stream - {full-stack-tube}

<https://full-stack-tube.vercel.app/>

A full-stack web application that provides dynamic, interactive user experiences, featuring secure authentication, and optimized video handling.

Technologies: React, TypeScript, Redux Toolkit, Node.js, MongoDB, JWT, OAuth, WebSockets, Cloudinary, Tailwind CSS.

[Github link](#)

- **User Authentication & Security:** Implements JWT, OAuth, and multi-factor authentication (MFA) for secure login and user access management, ensuring robust protection of sensitive data.
- **Media Management & Chunked Uploads:** Supports chunked video uploads to Cloudinary with progress tracking for efficient media management and seamless video processing.
- **Scalable Backend with MongoDB Aggregation:** Leverages MongoDB aggregation pipelines for data processing, enabling efficient querying and scalable backend functionality.

Video Conference - {meetMe}

<https://meetme-mlno.onrender.com/>

Developed a web-based video conference application using HTML, CSS, JavaScript, Socket.io, and WebRTC, featuring real-time video, audio, chat communication, and a collaborative whiteboard.

[Github link](#)

- **Room Creation & Real-Time Communication:** Users can create or join rooms with a unique ID, facilitating seamless video and audio conferencing using WebRTC for high-quality, low-latency communication.
- **Collaborative Tools & Chat:** Integrated a real-time collaborative whiteboard for shared interaction and a chat feature for seamless communication during video calls.
- **Responsive & Scalable Design:** Developed a responsive interface with HTML and CSS, ensuring a consistent user experience across devices, with future plans for UI/UX improvements and mobile support.

Weather Application - {TempU}

<https://temp-u.vercel.app/>

A web-based weather application that provides real-time weather updates and forecasts for both current and user-specified locations.

Technologies: HTML, CSS, JavaScript, OpenWeather API, GeoDB Cities API.

[Github link](#)

- **Real-Time Location Forecast & Custom Search:** Automatically retrieves current weather based on the user's location and allows custom location search for worldwide weather forecasts.
- **Detailed Hourly & Extended 15-Day Forecasts:** Provides hourly updates for the next 24 hours and a comprehensive 15-day outlook with temperature highs, lows, and engaging weather icons.
- **Adaptive Themes & Temperature Notifications:** Adjusts application themes based on the time of day and sends notifications for significant temperature changes, keeping users informed and enhancing their experience.

EDUCATION

Bachelor of Engineering in Computer engineering

Purbanchal University

Biratnagar, NP

Higher Secondary Education Board (+2)

Shikshadeep College

Biratnagar, NP

Secondary Education Examination

Saptakoshi English School

Biratnagar, NP
2017

SKILLS

HTML, CSS, JavaScript, React, Redux, TypeScript, Framer Motion, Responsive Design, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, OAuth, Multer, WebSockets, VS Code, Vercel, Render, Postman, Git, GitHub, Appwrite, Ngrok, Nodemon

COURSES

Programming with JavaScript

A comprehensive course offered by Coursera, covering JavaScript fundamentals to advanced techniques.

Introduction to Front-End Development

A comprehensive course offered by Coursera, covering front-end development fundamentals to advanced techniques for building interactive web app.
